Prime Scholar Prep

Practice on the real screen.

Walk in calm.

Friday, 6 November 2026 · 30 minutes · Samuel Amos

JAMB · WAEC · NECO · POST-UTME

WHAT HAS CHANGED

The exam is no longer on paper.

It is a screen, a countdown and a mouse. It has been for years, and it rewards the student who has met it before.

Ten minutes lost to the mouse is one sixth of a 120-minute paper.

Brilliant students rarely lose marks to hard questions. They lose them to the clock.

The hall tests three things reading cannot teach.

1

Recognition speed

Sixty seconds a question. Reading pace is not exam pace.

2

Nerve

A countdown that does not slow down because you are nervous.

3

The interface

The screen, the four options, the jump button. Part of the exam.

THE DIFFERENCE

Two students. Same brain. Different result.

READS WELL

Reads the textbook twice

Solves past questions on paper

Meets the timer on exam day

REHEARSES

Sits the real screen weekly

Finishes under a live countdown

Has already made the mistakes

The difference is rehearsal, not intelligence.

THE TOOL

A pocket CBT centre that behaves like the real exam.

1. **The exact screen**
   Same layout, same countdown, same options, same jump button.

2. **The real pattern**
   Questions built in the shape the exam asks them, not random trivia.

3. **Feedback at once**
   Right or wrong the moment you answer, explained in plain English.

INSIDE THE APP

Not a sampler. A bank you cannot exhaust.

36,000

exam questions

12,000

in JAMB, 12,000 in WAEC, 12,000 in NECO

1,763

topics with a 30-minute lesson each

One thousand questions per subject, and every topic carries its own lecture.

THE ADVANTAGE

You cannot fix what you cannot see.

A score tells you how you did. Analytics tell you which topics keep taking your marks, then the app drills those and leaves the rest alone.

Study time is the scarcest thing a candidate owns.

Spend it where it pays.

YOUR SCHOOL

Your school joins as a school.

Students who enter through the Sunshine link are grouped under Sunshine International School. The link carries the school code, so your cohort is never mixed into the public app.

One link. One cohort. One identity.

Sunshine International School · code X2UNADSU

WHY TRUST IT

Every number in this app can be checked.

Computable questions are solved by formula, never typed by hand.

2,000

items rebuilt from their own formulas this week

80

faulty questions found and repaired

100%

of lesson links checked for length and playability

An answer you cannot defend is a liability in the hall.

THE PRICE

Choose on what you can verify.

ELSEWHERE

₦4,000

per device, one exam focus

THIS WEEKEND

₦1,500

three months, all four exams

OR ONCE

₦4,500

lifetime, no renewal

Friday 6 to Sunday 8 November only. Sunshine link.

Afterwards ₦2,000 for three months or ₦12,000 lifetime. Free tier: two sessions a day, one lesson a subject.

THE PLAN

Six weeks. One test a day.

WEEKS 1-2

Build the habit

Two subjects, one test daily, no clock yet.

WEEKS 3-4

Review every miss

Add the other two. Read every explanation.

WEEKS 5-6

Full mock

Strict two hours. No phone.

EXAM WEEK

Stay calm

Flagged questions only. No new topics.

Started tonight, the plan finishes before the exam does.

TONIGHT

Start in five minutes.

1. Scan the code or type the link.
2. Create your free account.
3. Choose your four JAMB subjects.
4. Take one test tonight.
